DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 22, 2009 has been entered.
2. Applicants' submission of new claims 25-30 as well as amendments to claims 16,19 and 20 filed on January 22, 2009 are acknowledged.

Claims 11-20 and 25-30 are pending and examined on the merits.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. The rejections and objections not recited in this action are withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Anthony Conner (2000, US Patent Number 6,057,496).

The claims are drawn to a transgenic alfalfa plant comprising a nucleotide sequence encoding the antifungal protein of SEQ ID NO: 4 or a progeny thereof comprising the nucleotide sequence.

Anthony Conner teaches a transgenic alfalfa plant and the seed from the transgenic alfalfa plant (claim 14). Although Anthony Conner does not teach a nucleotide sequence encoding the antifungal protein of SEQ ID NO: 4, the transgenic plant of Anthony Conner inherently comprises an endogenous gene encoding the antifungal protein of SEQ ID NO: 4 given that the antifungal protein of SEQ ID NO: 4 is isolated from alfalfa plant. Therefore the reference teaches all the limitations set forth by the instant claims.

The rejection can be overcome by indicating that nucleotide sequence encoding the antifungal protein of SEQ ID NO: 4 is a transgene not an endogenous gene.

Summary

No claim is allowed.
